

**Specification:**

| Sl. No. | Targets                           | Description                                                                                                                                                                 | Quantity (Nos) |
|---------|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| 1       | Hafnium oxide (HfO <sub>2</sub> ) | 200x200x6mm <sup>3</sup> , 2-tile arrangement, purity 99.99%, Bonded on new Cu-plate (Nano bond), CEC-design for flexible arrangement of two materials forming zone-targets | 02             |

**Note:**

1. The target shall be compatible to the Navigator 700 - IBS20 coating chamber. Vendor has to provide a certificate from M/s Cutting edge coatings Germany, showing the compatibility of the target to the coating chamber.  
The vendors who can submit the above mentioned certificate from M/s Cutting edge coatings Germany, while submitting the offer will only be considered for technical evaluation.
2. Delivery schedule: Twelve weeks from the date of acceptance of purchase order.
3. Certificate of conformance by the manufacturer conforming its purity and Material safety data sheet, to be provided along with the supply.
