If it is specified in the Special Terms & Conditions that the price variation is applicable, the illustrative formula for Price Variation Clause [PVC] specified in General Financial Rules (GFR), 2017 (viz. Rule 225 (viii) (b) & Appendix 11) shall apply. The said formula for Price Variation is worked out as under:

The formula for Price Variation includes a fixed element, a material element and a labour element. The figures representing the material element and the labour element should reflect the corresponding

proportion of input costs, while the fixed element will not be subject to variation. The portions of the price represented by the material element and labour element alone will attract Price variation. The formula for Price variation will thus be:

$$P1 \text{ equal to } P0 \times [F \text{ plus } a (M1 /M0) \text{ plus } b (L1/L0)] \quad P0$$

Here, P1 is the adjustment amount payable to the Seller (a minus figure will indicate a reduction in the Contract Price).

P0 is the Contract Price at the base level.

F is the Fixed element not subject to Price variation.

a is the assigned percentage to the material element in the Contract price.

b is the assigned percentage to the labour element in the Contract Price.

L0 and L1 are the wage indices at the base month and year and at the month and year of calculation respectively.

M0 and M1 are the material indices at the base month and year and at the month and year of calculation respectively.

If more than one major item of material is involved, the material element can be broken up into two or three components such as Mx, My & Mz.

Where price variation clause has to be provided for services (with insignificant inputs of materials), the price variation formula should have only two elements viz. a fixed element and a labour element.
